Subject: RE: PFAS Summary Highlights - September

Thanks Joe.

Bob is in Martinsburg WV right now so I will respond for ATSDR R3. ATSDR is in the midst of recruiting participants for our DOD funded Exposure Assessments in Martinsburg WV and New Castle DE. The exposure assessments are where ATSDR and ATSDR contractors are collecting blood, urine, and limited environmental samples at 8 locations nationwide. We are going door to door to statistically selected households in WV starting today 9/4/19, and will continue that through next week. Blood and urine collection will follow shortly after that. Door to door recruitment in DE is slated to start in early October.

Selection of grantees for ATSDR's national multisite health study is expected soon, possibly by the end of September. This was an open application process, so grantees can be academics, community groups, health departments, etc.

Lora

Subject: PFAS Summary Highlights - September

Greetings all,

If you have any PFAS-related stories, news, or "salient-like" updates for sites with PFAS issues (sampling, partnering, remedies, etc.) please send me that information directly and I will include it in the September PFAS Summary Highlights sheets that will be used to brief the RA.

Apologies for the late notice, but a meeting with the RA is on the schedule for tomorrow, Thursday, September 5th. If you have any updates since last request in early August, please send to me at your earliest convenience.

Thank you.
